

Sustainability Assessment and Planning

- ✓ **Have your sustainability efforts stalled?**
 - ✓ **Not sure if you are focusing on the right things?**
- We can help.**

Effective sustainability planning goes beyond securing funding. It requires understanding the organizational and contextual factors that can impact the ability to maintain program/services and their benefits, and then strengthening the structures and processes that can be leveraged to weather changes and challenges over time.

Our team works with organizations to:

- Assess current capacity to sustain services/programs
- Identify facilitators and barriers to sustaining services
- Develop and implement a plan to sustain services
- Revise and improve sustainability action plans

Since 1985, The MayaTech Corporation has focused on tackling existing and emerging public health challenges through direct engagement with agencies, governments, communities, and individuals. We provide a suite of research, training, evaluation, capacity-building, and other strategic support services - all aimed at reaching/impacting the most vulnerable populations, amplifying best practices, and innovating the practice of public health.

Benefits

- Understand interconnected factors that impact sustainability
- Engage multiple staff and stakeholders in supporting future success of organizational operations
- Strengthen alignment of programs and services goals with stakeholder needs
- Identify program elements and services to be maintained, eliminated, or adapted
- Create actionable steps to new opportunities for partnership and collaboration
